

ADOP SDK Android ver.

Developer guide

Version 2.0.0
2017. 10. 20.

- Contents -

1. [Outline](#)
2. [Development Environment](#)
3. [SDK Installation Guide](#)
4. [Banner Advertisement](#)
5. [Interstitial Advertisement](#)
6. [Native Advertisement](#)
7. [Ending pop up Advertisement](#)
8. [ProGuard application method](#)

1. Outline

This is a guideline document on how to apply the ADOP Compass SDK Android version to the project.

Currently supported advertising platforms:

- Google adx
- Cauly
- Facebook Audience Network
- Mobfox
- Linkmine
- DawinClick
- Avocarrot

* *Reference* : Types of advertisements per every single network

	Banner			Interstitial	Native	Ending pop up
	320x50	320x100	300x250			
Google adx	O	O	O	O		
Cauly	O		O	O	O	O
Facebook	O		O	O	O	O
Mobfox	O		O	O		
Linkmine	O		O			
DawinClick	O			O		
Avocarrot					O	O

- ADOP Compass Mobile SDK Android 2.0.+ version provides Banner, Interstitial, Native and Ending pop up advertisements.
- ADOP Compass Mobile SDK could be used after getting the ID.

2. Development Environment

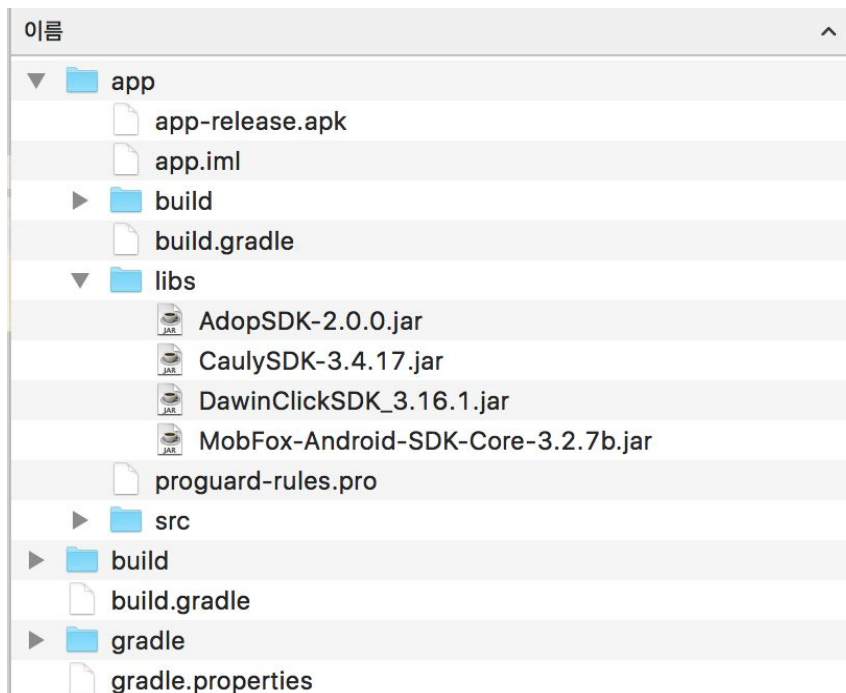

- Android Studio version : 2.3.3
- Android SDK version : At least above API 16

3. SDK Installation Guide

1) When using Android Studio

1. Please copy and paste the SDK below to the 'libs' folder of the relevant project.

- AdopSDK-2.0.0.jar
- CaulySDK-3.x.x.jar
- MobFox-Android-SDK-Core-3.2.7b.jar
- DawinClickSDK_3.16.1.jar

2. Please add the compile command below to 'build.gradle (Module: app)' of the relevant project.

```
dependencies {  
    ...  
    compile fileTree(dir: 'libs', include: ['*.jar'])  
  
    compile 'com.google.android.gms:play-services-ads:11.2.0'  
  
    //Add Facebook Audience Network SDK  
  
    compile 'com.facebook.android:audience-network-sdk:4.+'  
  
    //Add avocarrot SDK  
  
    compile 'com.avocarrot.sdk:mediation-sdk-nativead:4.6.0'  
  
    //In need of MobFox's Interstitial advertisement  
  
    compile 'com.danikula:videocache:2.7.0'  
}
```

* **Reference:** Advertising Platform SDK-site supported by ADOP

- Cauty : [Link](#)
- Facebook Audience Network : [Link](#)
- MobFox : [Link](#)
- Google Adx : [Link](#)
- DawinClick : [Link](#)
- Avocarrot : [Link](#)

3. Please add the compile command below to 'build.gradle (Project : Project name)' of the relevant project.

```
repositories {  
    ...  
    maven {  
        url "https://maven.google.com"    }  
}
```

```

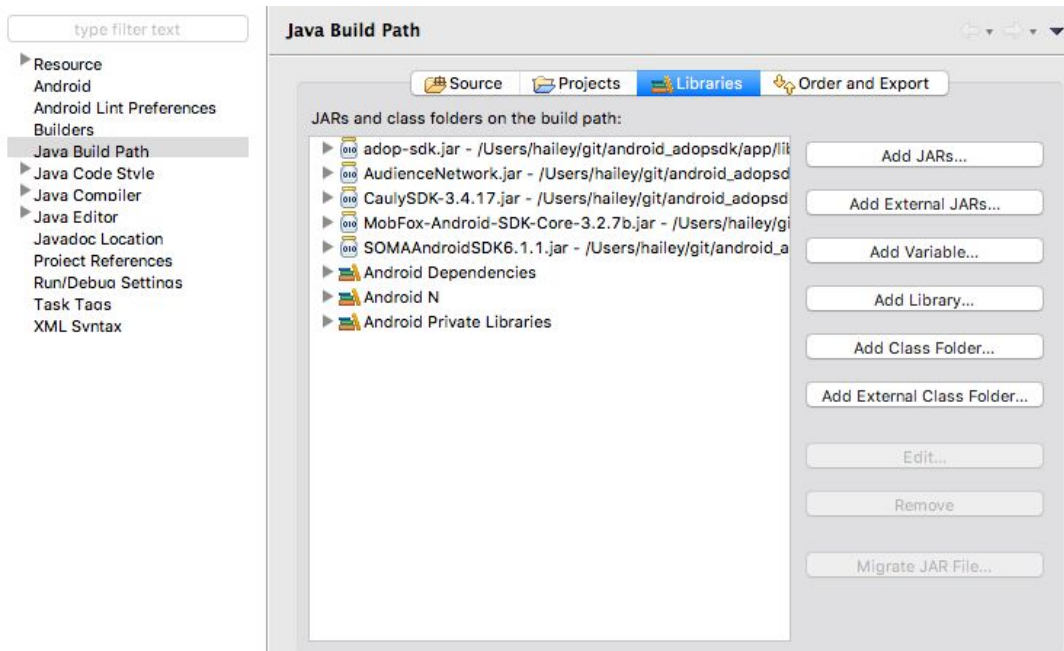

}
// Avocarrot (When using Native advertisement)
maven {
    url "https://s3.amazonaws.com/avocarrot-android-builds/dist/"
}
}

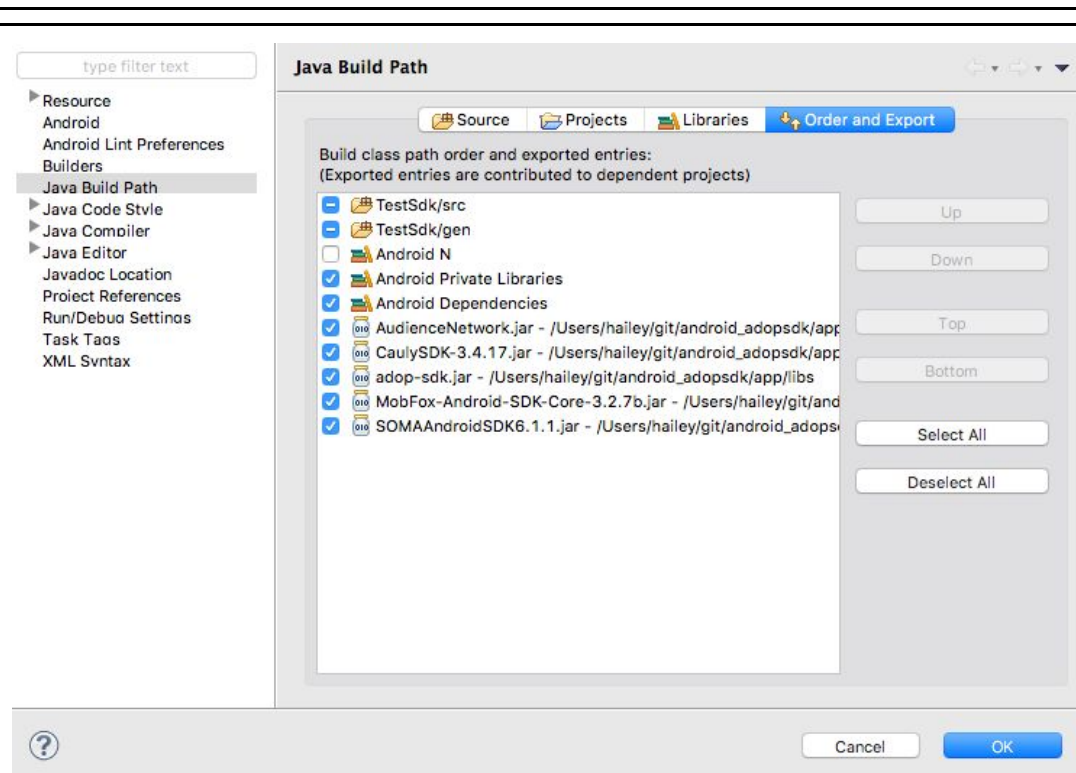

```

2) When using ADT

1. Import the SDK into the library in the project.

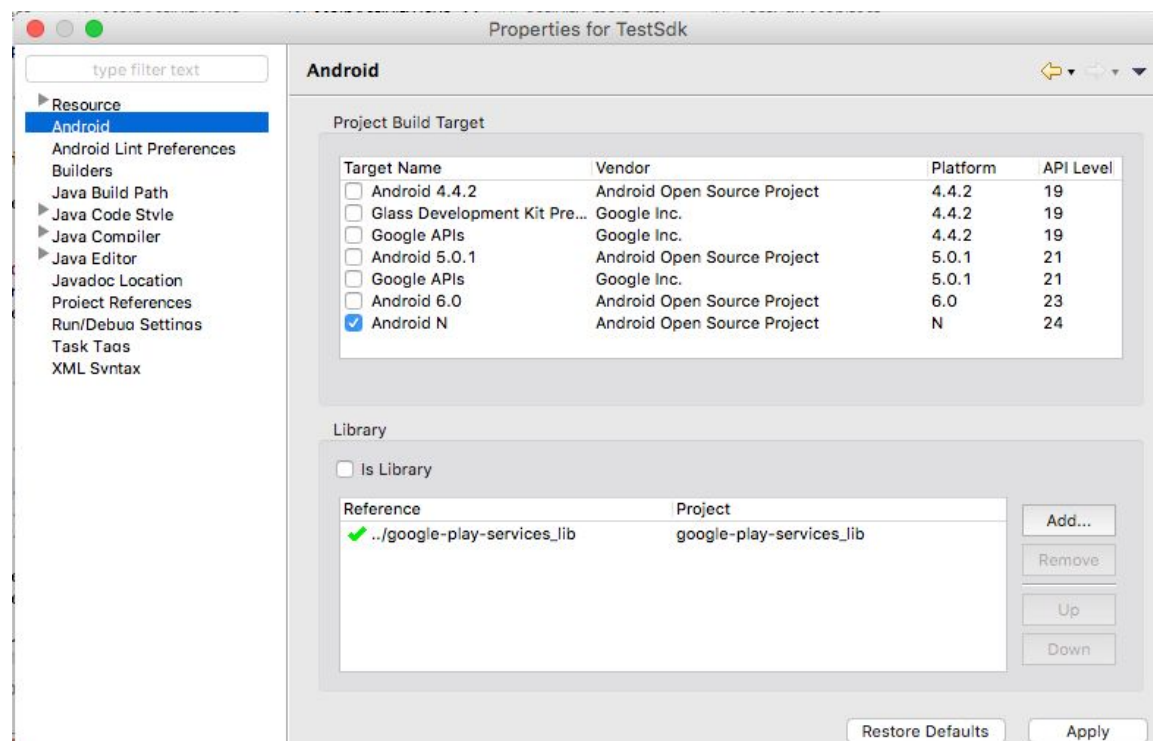

- Properties > Java Build Path > Libraries tab > 'Add External JARs'
- Properties > Java Build Path > Order and Export tab > Check the SDK File

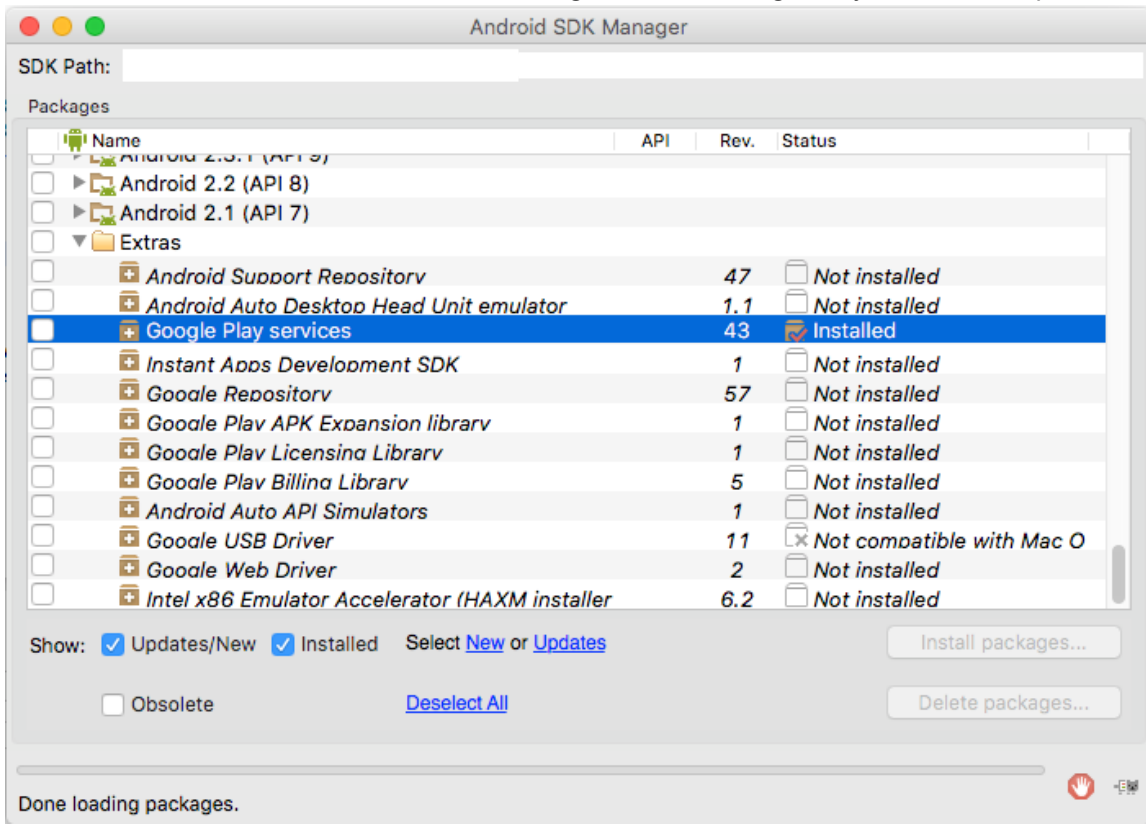

2. Please add the Google play service library

- Location :
`{Android_SDK_Location}\extras\google\google_play_services\libproject\google-play-services_lib`

- If it does not exist, install the SDK Manager > Extras/Google Play Services and proceed.

* Common

[Setting up House Banner]

: Please add the House Banner into the /res/drawable folder in the project.

(if you have no desired House Banner, add ADOP's house.png file which was sent to you together with the SDK)

[AndroidManifest.xml setting]

- Because this is a mandatory permission setting, you need to set it up to display advertisements correctly.

```
<uses-permission android:name="android.permission.INTERNET" />
```

```
<uses-permission android:name="android.permission.ACCESS_WIFI_STATE" />
```

```
<uses-permission android:name="android.permission.ACCESS_NETWORK_STATE" />
```

- Set up the Google Play service information.

```
<meta-data android:name="com.google.android.gms.version"
android:value="@integer/google_play_services_version"/>
```

- Set up the configChanges="orientation" in the Activity where the advertisement would be inserted.

* If the target Api Level is above 13

```
android:configChanges="keyboard|keyboardHidden|orientation|screenLayout|uiMode|
screenSize|smallestScreenSize"
```

* If the target Api Level is below 13

```
android:configChanges="keyboard|keyboardHidden|orientation|screenLayout|uiMode"
```

- When using Facebook Interstitial advertisements, set up as below.

```
<activity android:name="com.facebook.ads.InterstitialAdActivity"
android:configChanges="keyboard|keyboardHidden|orientation|screenSize" />
```

- When using MobFox Interstitial advertisements, set up as below.

```
<activity android:name="com.mobfox.sdk.interstitialads.InterstitialActivity"
android:hardwareAccelerated="true" />
```

```
<service android:name="com.mobfox.sdk.services.MobFoxService"
android:launchMode="singleTop" />
```

- When using DawinClick set up as below.

```
<activity android:name="com.skplanet.tad.AdActivity"
android:configChanges="keyboard|keyboardHidden|orientation|screenLayout|uiMode|s
creenSize|smallestScreenSize"
android:label="Ad Activity"
android:theme="@android:style/Theme.NoTitleBar" />
<receiver android:name="com.skplanet.tad.SyrupAdReceiver" >
    <intent-filter>
        <action android:name="com.skplanet.syrupad.action.SAID_CHANGED" />
    </intent-filter>
</receiver>
```

4. Banner Advertisement

[activity_main.xml]

```
<?xml version="1.0" encoding="utf-8"?>
<android.support.constraint.ConstraintLayout ...>

...
<!-- Set up the layout for displaying the advertisement (the layout format can be freely edited) -->
<android.support.constraint.ConstraintLayout
    android:id="@+id/bannerLayout"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    app:layout_constraintBottom_toBottomOf="parent"
    app:layout_constraintLeft_toLeftOf="parent"
    app:layout_constraintRight_toRightOf="parent">
</android.support.constraint.ConstraintLayout>

...
</android.support.constraint.ConstraintLayout>
```

[MainActivity.java] - 1

```
import com.adop.sdk.adview.BaseAdView;

public class MainActivity extends AppCompatActivity {

    static String ZONE_ID = "xxxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxx"; // Given ZONE ID

    ConstraintLayout layout;

    private BaseAdView mAdView;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        layout = (ConstraintLayout) findViewById(R.id.bannerLayout);
        mAdView = new BaseAdView(MainActivity.this);

        mAdView.setHouseImg(R.drawable.house); // House banner image from [3.SDK installation
        Guide-common]
        mAdView.setAdInfo(ZONE_ID); // Insert the given ID
        mAdView.setGravity(Gravity.CENTER); // Arrange in the middle (optional)
        mAdView.setInterval(30); // Advertisement refresh interval (unit: second)
                                   // Minimum 10 seconds ~ Maximum 120 seconds (Default without settings: 60
                                   seconds)
        mAdView.load(); // Load advertising enforcement

        layout.addView(mAdView);
    }
}
```

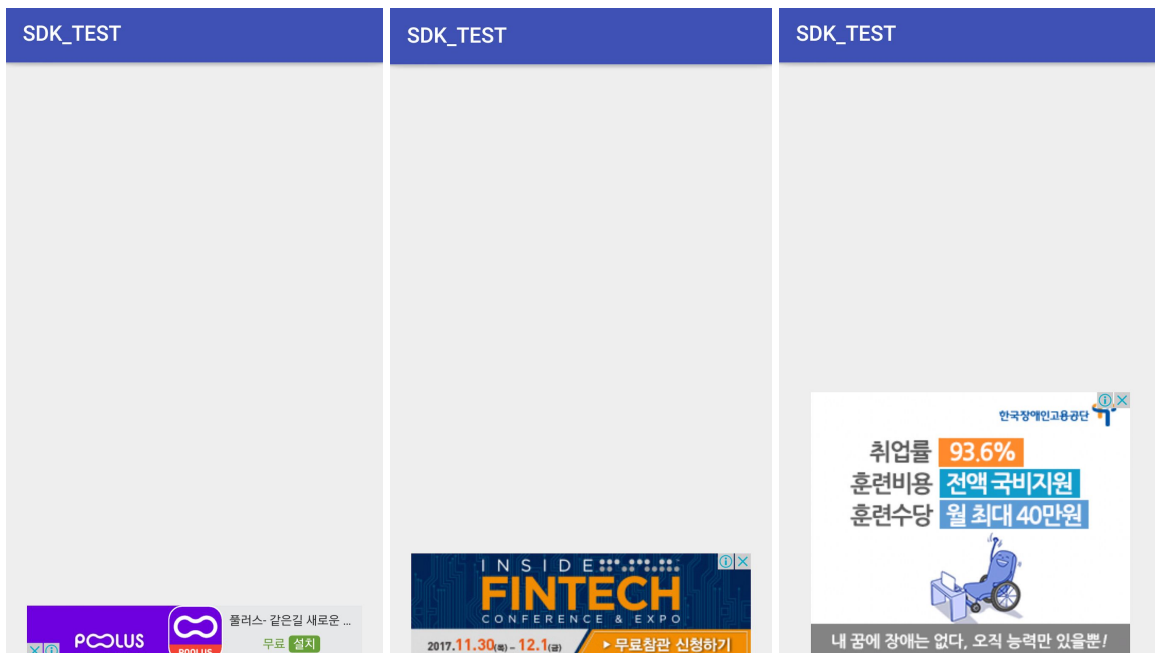

* [Reference](#) : The size of Banner depends on Compass setting.

[MainActivity.java] - 2

```
//Add function of Activity Life Cycle
@Override
public void onPause() {
    super.onPause();
    mAdView.onPause();
}
@Override
public void onResume() {
    super.onResume();
    mAdView.onResume();
}
```

[Result of Banner Advertisement]

- 320x50 / 320x100 / 300x250

5. Interstitial Advertisement

[MainActivity.java]

```
import com.adop.sdk.interstitial.BaseInterstitial;

public class MainActivity extends AppCompatActivity {

    static String ZONE_ID = "xxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxx"; // Given ZONE ID

    private BaseInterstitial mInterstitial;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        mInterstitial = new BaseInterstitial(MainActivity.this);
        mInterstitial.setAdInfo(ZONE_ID); // Insert the given ID
        mInterstitial.start(); // Advertising enforcement
    }
}
```

[Result of Interstitial Advertisement]

6. Native Advertisement

a. Template customising version

[activity_main.xml]

```
<?xml version="1.0" encoding="utf-8"?>
<android.support.constraint.ConstraintLayout ...>
...
<!-- Set up the layout for displaying the advertisement (the layout format can be freely edited) -->
<android.support.constraint.ConstraintLayout
    android:id="@+id/native_ad_container"
    android:layout_width="match_parent"
    android:layout_height="wrap_content"
    app:layout_constraintBottom_toBottomOf="parent"
    app:layout_constraintLeft_toLeftOf="parent"
    app:layout_constraintRight_toRightOf="parent">
</android.support.constraint.ConstraintLayout>
...
</android.support.constraint.ConstraintLayout>
```

[ad_native.xml]

```
<?xml version="1.0" encoding="utf-8"?>

<!-- This is just for example below, the layout format can be freely edited -->
<android.support.constraint.ConstraintLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:id="@+id/native_ad_unit"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    android:orientation="vertical">

    <TextView
        android:id="@+id/titleText"
        ... />
    <TextView
        android:id="@+id/bodyText"
        ... />
    <ImageView
        android:id="@+id/iconImage"
        ... />
    <!-- Facebook AdChoices icon (Essential element when calling Facebook advertisement) -->
    <LinearLayout
        android:id="@+id/adChoicesContainer"
        ... />
    <!-- Facebook, Avocarrot CTA(Call To Action) button (Essential element when calling Facebook,
    Avocarrot advertisement)-->
    <Button
        android:id="@+id/adCallToActionButton"
        ... />
    <!-- View creation for main page -->
    <com.adop.sdk.nativead.CustomNativeImageView
        android:id="@+id/imageView"
        ... >
    </com.adop.sdk.nativead.CustomNativeImageView>

</android.support.constraint.ConstraintLayout>
```

[MainActivity.java]

```
import com.adop.sdk.nativead.BaseNativeAd;
import com.adop.sdk.nativead.CustomNativeImageView;

public class MainActivity extends AppCompatActivity {

    static String ZONE_ID = "xxxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxx"; // Given ZONE ID

    private BaseNativeAd mNativeAd;

    private ConstraintLayout nativeAdContainer, adView;
    private TextView titleText, bodyText;
    private ImageView iconImage;
    private CustomNativeImageView imageView;

    private LinearLayout adChoicesContainer;
    private Button adCallToActionButton;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        nativeAdContainer = (ConstraintLayout) findViewById(R.id.native_ad_container);
        LayoutInflater inflater = LayoutInflater.from(MainActivity.this);
        adView = (ConstraintLayout) inflater.inflate(R.layout.ad_native, nativeAdContainer, false);
        nativeAdContainer.addView(adView);

        titleText = (TextView) findViewById(R.id.titleText);
        bodyText = (TextView) findViewById(R.id.bodyText);
        iconImage = (ImageView) findViewById(R.id.iconImage);
        imageView = (CustomNativeImageView) findViewById(R.id.imageView);

        adChoicesContainer = (LinearLayout) findViewById(R.id.adChoicesContainer);
        adCallToActionButton = (Button) findViewById(R.id.adCallToActionButton);

        mNativeAd = new BaseNativeAd(MainActivity.this);
        mNativeAd.setAdInfo(ZONE_ID); // Insert given ID

        mNativeAd.setNativeAdContainer(nativeAdContainer);
        mNativeAd.setTitleText(titleText); // the mapping of title text unit
        mNativeAd.setBodyText(bodyText); // the mapping of body text unit
        mNativeAd.setIconImage(iconImage); // the mapping of icon image unit
        mNativeAd.setMainImage(imageView); // the mapping of main image unit

        mNativeAd.setAdChoicesContainer(adChoicesContainer); // AdChoices icon unit mapping
        (Essential element of Facebook)
        mNativeAd.setAdCallToAction(adCallToActionButton); // CTA(Call To Action) mapping of button
        unit (Essential element of Facebook, Avocarrot)

        mNativeAd.setHouseTitleText("ADOP"); // The title for House ad exposure
        mNativeAd.setHouseBodyText("For Advertising Revenue Optimization, Let's be together with
the ADOP."); // The body for House ad exposure
        mNativeAd.setHouseIconImage(R.drawable.adop_logo); // The icon image for House ad exposure
        mNativeAd.setHouseMainImage(R.drawable.house_300x250); // The main image for House ad
        exposure

        mNativeAd.load();
    }
}
```

b. Template fix version

[activity_main.xml]

```
<?xml version="1.0" encoding="utf-8"?>
<android.support.constraint.ConstraintLayout ...>
...
<!-- Set up the layout for displaying the advertisement (the layout format can be freely edited) -->
    <android.support.constraint.ConstraintLayout
        android:id="@+id/native_ad_container"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintLeft_toLeftOf="parent"
        app:layout_constraintRight_toRightOf="parent">
    </android.support.constraint.ConstraintLayout>
...
</android.support.constraint.ConstraintLayout>
```

[MainActivity.java]

```
import com.adop.sdk.nativead.BaseNativeTemplateAd;

public class MainActivity extends AppCompatActivity {

    static String ZONE_ID = "xxxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxx"; // Given ZONE ID

    private BaseNativeTemplateAd mNativeTemp;
    private ConstraintLayout nativeAdContainer;

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
        setContentView(R.layout.activity_main);

        mNativeTemp = new BaseNativeTemplateAd(MainActivity.this);
        mNativeTemp.setAdInfo(ZONE_ID); // Insert the given ID

        nativeAdContainer = (ConstraintLayout) findViewById(R.id.native_ad_container);
        mNativeTemp.setNativeAdContainer(nativeAdContainer);

        mNativeTemp.setLayoutColor(Color.WHITE); //Designation of layout color (optional)
        mNativeTemp.setTitleTextColor(Color.BLACK); //Designation of title color (optional)
        mNativeTemp.setBodyTextColor(Color.GRAY); //Designation of body text color (optional)

        mNativeTemp.setButtonColor(Color.WHITE); //Designation of CTA(Call To Action) button color
        (optional)
        mNativeTemp.setButtonTextColor(Color.GRAY); //Designation of CTA(Call To Action) text color
        (optional)
        mNativeTemp.setButtonBorderColor(Color.BLACK); //Designation of CTA(Call To Action) outline
        color (optional)

        mNativeTemp.setHouseTitleText("ADOP"); // The title for House ad exposure
        mNativeTemp.setHouseBodyText("For Advertising Revenue Optimization, Let's be together
with the ADOP."); // the body for House ad exposure
        mNativeTemp.setHouseIconImage(R.drawable.adop_logo); // Icon image for House ad exposure
        mNativeTemp.setHouseMainImage(R.drawable.house_300x250); // Main image for House ad
        exposure
```

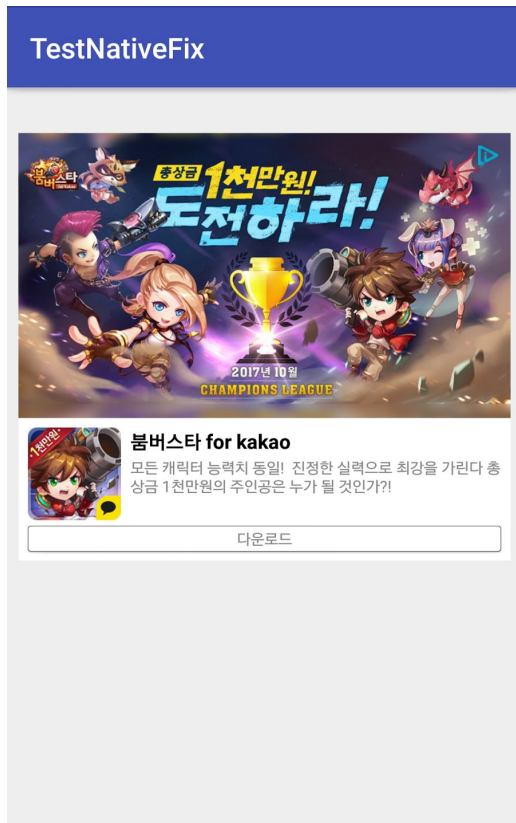

```

        nativeAdContainer.addView(mNativeTemp);

        mNativeTemp.load();
    }
}

```

[Example of Native Advertising]

7. Ending pop up Advertisement

[MainActivity.java]

```

import com.adop.sdk.nativead.CustomDialog;

public class MainActivity extends AppCompatActivity {

    private CustomDialog mCustomDialog;
    static String ZONE_ID = "xxxxxxx-xxxx-xxxx-xxxx-xxxxxxxxxxxx"; // Given ZONE ID

    @Override
    protected void onCreate(Bundle savedInstanceState) {
        super.onCreate(savedInstanceState);
    }
}

```

```

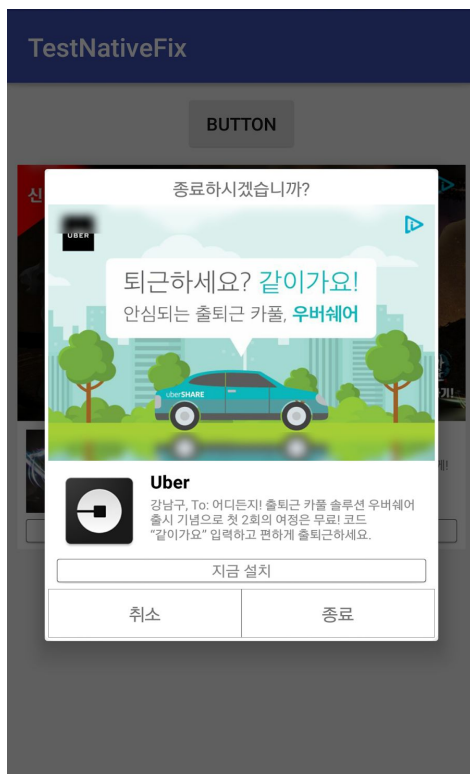

setContentView(R.layout.activity_main);
/* pre-order Ending pop up Advertisement */
mCustomDialog = new CustomDialog(MainActivity.this);

mCustomDialog.setAdInfo(ZONE_ID); // Insert the given ID
mCustomDialog.setHouseTitleText("ADOP"); // Title for House ad exposure
mCustomDialog.setHouseBodyText("For Advertising Revenue Optimization, Let's be together
with the ADOP."); // Body for House ad exposure
mCustomDialog.setHouseIconImage(R.drawable.adop_logo); // Icon image for House ad exposure
mCustomDialog.setHouseMainImage(R.drawable.house_300x250); // Main image for House ad
exposure
mCustomDialog.load(); // calling the Ending pop up Advertisement
}

@Override
public boolean onKeyDown(int keyCode, KeyEvent event) {
    if (event.getAction() == KeyEvent.ACTION_DOWN) {
        if (keyCode == KeyEvent.KEYCODE_BACK) { // Implement when clicking the back button
            mCustomDialog.start(); // Implement of dialog
        }
    }
    return super.onKeyDown(keyCode, event);
}
}

```

[Example of Ending pop up Advertisement]

8. ProGuard application method

- For code obfuscation, you need to add the comments below while setting up the ProGuard to properly display advertisements.

#Adop

```
-dontwarn android.webkit.**
-keep class com.adop.sdk.adview.BaseAdView { public *; }
-keep class com.adop.sdk.interstitial.BaseInterstitial { public *; }
-keep class com.adop.sdk.nativead.BaseNativeAd { public *; }
-keep class com.adop.sdk.nativead.BaseNativeTemplateAd { public *; }
-keep class com.adop.sdk.nativead.CustomNativeImageView { public *; }
-keep class com.adop.sdk.nativead.CustomDialog { public *; }
-keep class com.adop.sdk.AdEntry { public *; }
```

#Cauly

```
-dontwarn com.fsn.cauly.**
-keep public class com.fsn.cauly.** {
    public protected *;
}
-keep public class com.trid.tridad.** {
